

Bottle Filling Station
Freestanding

Oasis Outdoor Bottle Filling Station

This outdoor refill station is ideal for campuses and recreational areas.

- Accessible and easy-to-use design
- Made from vandal-resistant materials
- Available in white, forest green and navy

Product features and benefits

Vandal resistant

Constructed from durable 300 series stainless steel, this product is designed to withstand harsh environmental conditions and resist damage from vandals. The high-quality stainless steel base ensures long-lasting protection, maintaining both the integrity and appearance of the product over time, no matter the weather or external pressures.

No electrics required

The Oasis outdoor bottle filling station features a self-contained design, eliminating the need for electrical connections and making installation quick and easy. Its all-in-one construction allows for flexible placement in a variety of locations, offering a hassle-free setup without the need for complex wiring or external power sources.

Push button operation

Simple push-button interface provides quick and effortless access to refreshing hydration. This intuitive system makes refilling fast and convenient.

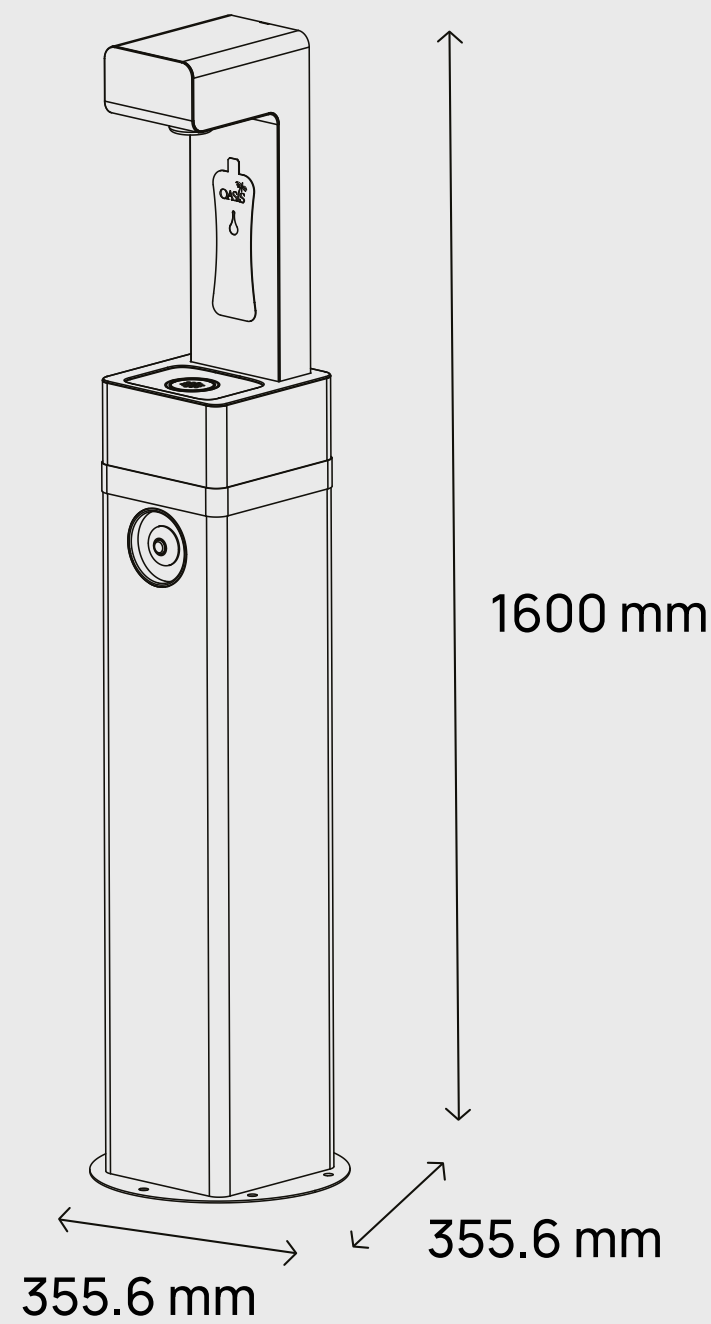

Lead-Free Construction for Safe Waterways

Made with lead-free materials, ensuring safe and clean water flow without the risk of contamination.
